ABOUT ME

I would like to be part of an organisation where I could use and enhance my knowledge for the development of both organisation and myself.

WORK EXPERIENCE

○ March 2023 - November 2023

Technoldentity

Associate Software Dev Trainee

As a software developer at the organisation, I have worked on various front-end projects using React, Tailwind and Typescript.

AI Chatbot - Team Member

Created multiple webpages for a chatbot UI using ReactJS, HTML and Tailwind CSS.

TloS - Team Member

Created multiple webpages for an Internal project to maintain and document all the company records using ReactJS, HTML and Tailwind CSS.

PROJECTS

○ Smart Irrigation System using IoT (BLYNK App)

The objective of this system is to detect the moisture content of the soil and depending on it sprinkle water. This entire information will be sent to the user's mobile phone. This is achieved by using a smart platform of IoT and Arduino to control the flow of water based on the moisture of the soil and gives real time surveillance to the owners who stay far away from the farms.

○ Canteen Management System

The main goal of this project is to solve many of the problems in managing canteens on campus. The primary goal of this project is to address many of the problems that come with managing canteens on campus. This project will allow for a more inclusive experience for everyone on campus by providing a centralized location for food and drinks that is easily accessible to all students.

CERTIFICATIONS

Web development using Django - APSSDC

Web development Intern - Exposys Data Labs

Data Analytics with Python - NPTEL
